
PREOPERATIVE GUIDELINES

LOCAL PROCEDURES

ONE WEEK BEFORE SURGERY

Discontinue taking aspirin, Advil, Nuprin, Aleve, Motrin or any drugs containing aspirin for at least 7 days before your surgery. All Herbal supplements, diet drugs or supplements, extra vitamin E, or any other oil supplements should be discontinued. These medications interfere with normal blood clotting. Tylenol can be used if necessary. **You may continue to take a multivitamin and 2000mg Vitamin C daily. Please refer to the list of medications to avoid on page 2.**

Refrain from drinking alcoholic beverages for at least 5 days prior to your surgery. Alcohol acts as a blood thinner, making it difficult to control bleeding during surgery.

Do not smoke. Nicotine acts as a vasoconstrictor (reduces blood supply, and slows healing). Smokers have a greater risk of skin or flap loss and wound healing complications. Second hand smoke can also delay wound healing, and increase the risk of wound healing. Smoking and second hand smoking can adversely affect the quality and character of the final scar.

Avoid sunbathing to the planned surgical area 1 week before surgery. Sunburn increases bleeding at the time of surgery, as well as during the healing phase after surgery.

Wash surgical site twice a day with an antibacterial soap for 48 hours before surgery.

THE DAY BEFORE SURGERY

For procedures requiring only local anesthesia, there is no need to fast and please take all of your regular medications up to and including the day of surgery (especially blood pressure or diabetes medications).

THE DAY OF SURGERY

For local procedures you may drive yourself to and from the Office or Hospital

Remove all makeup, nail polish, hairspray or mousse etc, before coming to the hospital if surgery is to be performed on the head, neck or face.

If your procedure is at the Hospital, be sure to bring your Consent Forms with you!

MEDICATIONS TO AVOID PRIOR TO SURGERY

Anticoagulants and Antiplatelet Agents, such as COUMADIN, WARAFIN, DIPYRIDAMOLE OR PERSANTINE, HEPARIN, LOVENOX, TICLOPIDINE (TICLID), TRENAL, PLAVIX, PRADAXA AND PLETAL, **MAY NEED TO BE STOPPED AS DIRECTED BY YOUR ORDERING PHYSICIAN A FEW DAYS PRIOR TO YOUR SURGERY.**

- MANY OVER THE COUNTER DRUGS CONTAIN ASPIRIN AND/OR IBUPROFEN. CHECK THE DRUG LABEL FOR THIS INFORMATION
- INFORM YOUR DOCTOR OR NURSE OF ALL PRESCRIPTION DRUGS YOU ARE TAKING.
- IF YOU HAVE ANY QUESTIONS ASK YOUR DOCTOR OR PHARMACIST

The following drugs and supplements either contain aspirin and/or have undesirable side effects that may affect your surgery (abnormal bleeding and bruising). These drugs should be avoided for 7 DAYS prior to minor surgery or 14 DAYS prior to major surgery. If you need to take something for relief of minor pain you may take Tylenol.

A.S.A./A.S. Enseals	Ecotrin	Pamelor
Actron	Empirin with codeine	Pamprin
Acuprin	Endep	Parnate
